

- 20/0 Princeton Monogram "mini detailer" 3050M  
<https://gildedplanet.com/goldpowder.html> This site is a source for shell gold. I like the 23K or 23.75K shell gold powder.
- Small ceramic dish preferably a white ceramic dish which will be the mixing bowl as well as the storage container for the shell gold. This dish should not be much larger than 4" or so and it should be shallow. I like to slide my dish into a small plastic bag to keep the dust out of it.

The recipe I am sharing with you today is for .4 gram of gold powder. So when you are purchasing try to purchase/calculate that particular measure. The recipe is basically .4 gram gold powder to 1 t. Gum Arabic powder and distilled water. Remember, it is the method of grinding that makes all the difference.
